PRICE LIST of TREES SHRUBS PLANTS and EVERGREENS

SPRING 1919

ANDORRA NURSERIES

WM. WARNER HARPER, Proprietor

CHESTNUT HILL, PHILA., PA.

ANDORRA NURSERIES

ARE extensive, covering a thousand acres, of which over six hundred are planted with trees and shrubs. They are easy of access, as Chestnut Hill is the terminus of branches of the Pennsylvania Railroad (take train at Broad Street Station) and the Philadelphia and Reading Railroad (take train at the Terminal, 12th and Market Streets). At Chestnut Hill, take the (City Line) Trolley which runs to City Line, within three minutes' walk of the Nurseries.

QUALITY.—The trees and shrubs offered are grown in open, unsheltered ground, in very exposed situations, which insure their hardiness, and on soil admirably adapted for forming robust plants having an abundance of roots. Special attention is called to the fact that our stock is grown a good distance apart in the rows, insuring heavier trees and shrubs than are generally offered.

SERVICE.—Andorra offers its stock fresh dug—carefully and quickly handled and most thoroughly packed. No storage stocks are carried and no "Just Imported" trees or plants are offered unless such case is plainly stated. Each order is prepared for the individual purchaser and not "pulled off a storage shelf."

PRICES.—Are not the lowest in the Trade, nor the highest, but are as low as high quality stock can be grown and sold at a fair profit and no higher grade stock is produced in the States to-day. Price alone does not insure satisfaction. Our offer is High Quality Stock Well Served at a Fair Price.

TERMS

PRICES.—Subject to change without notice, are for the goods f. o. b. our shipping station, or for local delivery by motor or f. o. b. customers' place if within ten miles of our Nurseries. Terms can be arranged for longer deliveries.

STOCK SELECTED by customers at the Nurseries will be charged according to the value of the trees chosen.

QUANTITY.—Lots of 5 and 50 will be furnished at the 10 and 100 rates respectively.

PACKING.—All goods are thoroughly packed, insuring best protection while in transit. All packing charges are included in our list prices, except for stock of unusual sizes, when the packing costs will be a matter of special arrangement.

GUARANTEE AND CLAIMS.—All goods are guaranteed true to name, full count, up to grade, and in good condition when shipped. Any plant proving untrue to name will be replaced. Claims to receive consideration must be made within **five days** after receipt of goods. **We give no guarantee of the life of stock.**

TERMS, CASH WITH ORDER, except to persons who satisfy us as to their responsibility, when accounts will be due in 30 days.

SHIPPING INSTRUCTIONS

ORDERS.—All orders are accepted subject to the following terms and conditions. Write plainly and give explicit directions as to address and mode of shipment.

SHIPPING SEASON opens about March 1 in the spring and August 1 in the fall.

INSPECTION AND FUMIGATION.—Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when the State laws require it.

FORWARDING.—Shipments will be forwarded exactly as directed; but when without instructions, we will use our best judgment and forward by shortest and safest route. We recommend all herbaceous plants be shipped by express.

☞**RISK.**—All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

☞**CLAIMS for damage while in transit** must be made to the delivering company. Have delivering agent note the damaged condition on the freight bill and promptly present your claim to the transportation company and send copies of all papers so we can help secure prompt settlement..

ADDRESS all correspondence and orders to the Nurseries and not to individuals.

TREES

OF

UNUSUAL CHARACTER AND SIZE

The individuality of a tree can never be expressed by any listing of height or breadth, nor do such figures indicate form or worth; the following notes are of rare pieces.

BOX BUSH. Specimens.

Grown and transplanted for many years in our Nurseries, these rare old Box Bush range in height from four to seven feet, and to seven feet in breadth. See also pages 23 to 25.

SPRUCE. Specimens.

The Oriental Spruce with its deep green foliage, and the popular Colorado Blue Spruce in sizes up to 16 feet in height, and in many cases of double the average breadth. See also pages 11 and 12.

RETINOSPORA. Specimens.

Over twenty years' growth is represented in many of these choice pieces which are trained into pyramid, broad pyramid, oval pyramid, and columnar shapes. Pieces of twelve to eighteen feet in height and of a breadth of four to ten feet according to the form. See also pages 14 to 16.

CEDARS. Specimens.

Our common Red Cedar and its types, the Blue Virginiana glauca and the dark green Virginiana Schotti, in heavily trimmed, nursery specimens with a weight of body and a denseness of branch and foliage that is unusual. See also pages 6 to 10.

PINES. Specimens.

Between ten and eighteen feet in height, having a spread of from six to twelve feet, are furnished with fibrous roots insuring quick results. See also pages 12-13-14.

MAPLES. In variety.

Sugar, Norway and Schwedler's Purple are offered in large sizes—regularly prepared for transplanting and are not a large risk.

OAKS.

In such sorts as Red, Pin, Scarlet and Bicolor, from 4 to 8 inches in diameter of stem, some sorts up to 12 inches will give splendid effects at once.

EVERGREEN TREES

For many years we have made a specialty of growing Evergreen Trees. Our Nursery soils are particularly well adapted to the formation of the fine fibrous feeding roots, and, at the same time, the soil is of such a consistency that our frequently transplanted trees, with their masses of fiber, retain the soil protecting the roots when the trees are lifted for transplanting, and they do this without the soil packing hard as is often the case when evergreens are lifted from heavy clay land.

We want to especially emphasize the importance *of the transplanted tree* and the frequency with which our evergreens are transplanted in the Nursery. In no other way can the proper system of fibrous roots be obtained, and it is the all-important item when transplanting to secure a satisfactory growth, and assure you maximum results at the minimum of time and money.

RHODODENDRONS

HYBRID VARIETIES—ANDORRA-GROWN

Our offering of Rhododendrons consists of many thousand plants, in tested varieties, and in a range of sizes from one to five feet. These are acclimated—*Andorra-grown* stock—in the hardiest varieties. They are grown in open, unsheltered ground, with northern exposure, and the wind-swept hills of Andorra are not kind to anything of a tender nature.

RHODODENDRONS

HOW TO USE THEM FOR BEST EFFECTS

Rhododendrons, to secure the best effects, should be planted in combination with other things. If along the woodland or in heavy boundary plantings, the Hemlock, the White Pine, the Dogwood, native Viburnums and plants of like character tend to break up the monotony of heavy masses of Rhododendrons of the same form and texture; and where the plantings are more confined as about the base line of buildings, and in nooks and corners of the garden, the Dogwood, the *Cornus mascula.* Kalmia, ferns of different varieties, stronger-growing perennials, and last, but not least, the hardy little shrub, *Abelia rupestris,* all can be used to secure most pleasing effects.

LARGE SIZES FOR IMMEDIATE EFFECT

Specimen Norway Maples in Wide Rows.

DECIDUOUS TREES

Large trees have been in demand for many years as purchasers wish quick results. In a great measure the difficulty has been to secure a large tree that would grow as satisfactorily as those of smaller size.

Appreciating the demand for a perfect tree in a large size we have for years devoted great care and large sums of money transplanting trees in unusually large nursery grades, and our customers can depend absolutely upon receiving, with any of the large sizes offered in this list, a root system which makes it practical and desirable to secure the large sizes and get immediate results.

Measurements are given as follows: Height is taken before digging, from the surface of the ground to the top branches, where they round off to form the top; diameter of stem, or caliper, is taken 6 inches above the ground, above the collar. Measurements are expressed thus: 10 to 12 ft. (height), 2½ to 2¾ in. (caliper).

Planting for Immediate Effect

In these days when the planting problem is usually one of quick results, the question is not only one of large size of stock, but the vital question is high quality in stock, without which large size is worse than useless.

To this end we have developed our large stock through years of Nursery Training—by frequent transplantings to produce fibrous-feeding roots—by constant, intelligent cultivation and pruning to instill the utmost vigor.

Thus we have produced **Andorra Quality**—large sizes that thrive after transplanting. You have our interest in your problems at all times. Consult us freely.

HARDY HERBACEOUS PLANTS

Size of Plants. We aim to send out only extra-strong plants of the different sorts—plants that will give a fair return of bloom the first season. These cost but little more than the small plants so widely offered, and our customers find it more satisfactory to use Andorra-grown stock, which gives results. It has been well said, "The lowest prices are not always the cheapest, as cheapness does not consist in what you pay, but in what you get for what you pay."

TREES AND SHRUBS FOR HEDGES

We shall be pleased to name special prices for plants in large quantity for hedging purposes. Prices per hundred are given on pages indicated.

EVERGREEN TREES

The following are only a few of the varieties that may be used for the purpose, but the list covers the most popular. We ask particular attention to the Hemlock, Tsuga Canadensis, which is one of the most popular and at the same time one of the most satisfactory evergreens for hedging purposes.

	Page		Page
Picea excelsa	11	Thuya occidentalis	19
Retinospora plumosa	16	Thuya occidentalis Wareana	20
Retinospora plumosa aurea	16	Tsuga Canadensis	21

DECIDUOUS TREES

A few of the most desirable trees adapted for close planting for hedges are as follows: We call particular attention to the Cockspur Thorn, Cratægus Crus-galli, which makes a magnificent defensive hedge. Strong growth, beautiful foliage and adaptability to trimming place it in the front rank of trees for hedges.

	Page		Page
Carpinus Caroliniana	38	Cratægus Cordata	39
Carpinus Betulus	38	Cratægus Oxyacantha	40
Cratægus Crus-galli	39	Fagus sylvatica	40

EVERGREEN SHRUBS

There is no doubt that the Boxwood stands first among evergreen shrubs for hedge purposes. The plants we are offering are home-grown, therefore thoroughly acclimated, and will give excellent results. They should not be compared with the freshly imported Box upon which you have to take the risk until it is acclimated.

Azalea amoena	22	Ilex crenata microphylla	26
Buxus sempervirens	23	Mahonia aquifolia	27
Buxus sempervirens suffruticosa	25	Mahonia Japonica	27

DECIDUOUS SHRUBS

Of the following the Berberis Thunbergii will make the lowest and closest hedge. Next would be the Ligustrum Regelianum, but both of these sorts will carry their branches and foliage right down to the ground. Of the other varieties the Ligustrums lend themselves readily to shearing for formal hedges, while the Hibiscus should be planted where the freer growing hedge is desired and the other sorts should be used where free-growing, untrimmed hedges are wanted.

	Page		Page
Acanthopanax spinosa	51	Ligustrum Ibota, Regelianum	57
Berberis Thunbergii and vulgaris	51	Ligustrum ovalifolium, vulgare	57
Elæagnus longipes	55	Lonicera Tartarica	58
Forsythia Viridissima	56	Rhamnus cathartica	59
Hibiscus Syriacus	56		

INDEX

The following very complete Index will serve for a ready reference to the Trees, Shrubs and Plants not only by their Botanical names but by the Common or Local names as well.

This list comprises a large collection, and from this vast array of plant material you may select everything required for a complete planting.

In addition to the items given in this list, we have many varieties of Trees, Shrubs and Plants in small quantities, quantities too small to offer in a general list, but covering *a stock quite large enough to supply your wants*, and, therefore, if you do not find in this list the particular item you require, write us about it.
